

For Facilitators: *Add the Power of Visuals*

One Day Workshop in Auckland - 17 February 2011

Learn how to combine graphics and words to:

- **Capture and present ideas** and information even more effectively
- **Increase group memory** and recall
- **Add innovation and creativity** to workshops, sessions or meetings
- Get people **really involved and interested** in topics

Did you know that the majority of people have a strongly developed visual preference for learning and retaining information? Why not learn how to tap into this for your groups? Simple graphics can add clarity, creativity and engagement to facilitation sessions.

Join us at *Graphics Made Easy* one day workshop and learn how to combine graphics and words to keep people engaged, interested and involved. It'll help your groups remember much more too!

Graphic facilitation is a great way to increase a group's engagement, improve its communication and dramatically improve the impact of meetings

Workshop leader and Zenergy associate Penny Pullan, visiting from the UK, is the founder of [Making Projects Work](#), a training and facilitation company based in the UK. She's a creative and innovative leader, with the ability to think 'outside the box' with a passion and drive to make things happen. Penny has a variety of graphic tools and techniques for you to try out. For more about Penny Pullan see:
